Jehovah Witnesses in Street Argument Here; 19 in Hardin County Jailed.

Public agitation involving Jehovah's Witnesses occurred Saturday night in Marion and Hardin counties

Marion County Sheriff Fred F Miller and a group of Witnesses were central figures in a controversy which started at State and Center streets and came to an end near the Witnesses headquarters after out of the sect was pursued down West Center street The trouble which drew a crowd of nearly a hundred persons resulted from an argument over the part of the sects doctring which

prohibits them from saluting the American flag Thirteen Witnesses were arrested in Kenton on charges of selling magazines without per mits and six were arristed in M. Victory on disorderly ton duct charges

Here's what's happened to Gulf Gasolines shown in four simple pictures

There is a scientific test, employed by us and by many of our competitors, that is used to determine the anti-knock value of a motor fuel. According to that test, the figure above represents the old GOOD GULF-famous as one of the nnest regular gaso lines in America!

But look at the NEW GOOD CULF! This is a fair comparative measurement of the tremendous improve ment in this great gasoline GOOD GULF is now enormously improved without a penny s added cost to you . . . will give superb performance in your modern, high compression engine.

An equally sensational improvement has been made in GULF NO NOX. This figure shows the rating of the old NO NOX, then one of the super fuels of its day and KNOCKPROOF under all normal driving conditions.

Now look at the NEW NO-NOX! Tremendously better than even the old NO NOX . . . and far, far ahead of any regular gasoline sold anywhere in America today! NO REGULAR GASOLINE-NOT ONE -CAN COMPARE WITH GULF NO NOX!

# Rebuilt Mill Will Be Ready To Process Local Soy Beans When New Crop Is Cut At Harvest Season

"We will be ready to process soy beans before the new crop is harvested." Mr. P. Turner, president of Old Fort Mills, Inc., declared today. "Rebuilding of our plant is progressing satisfactorily and we expect to have it ready for operation next month. We will be in the market to buy soy beans as soon as the new crop begins to move and will resume the manufacture of Old Fort 41% expeller soybean oil meal.'

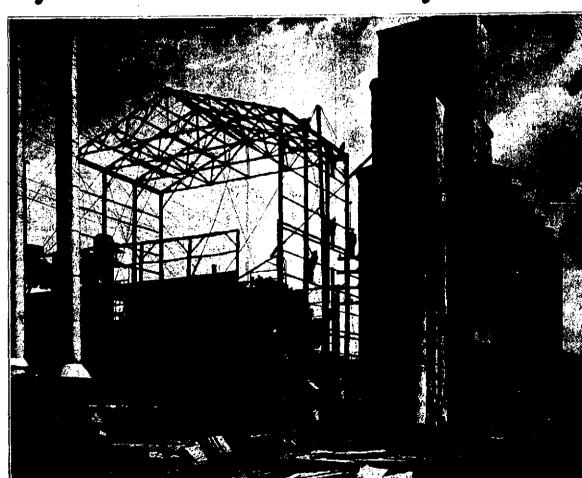

The Old Fort Mills soy bean processing plant was destroyed by fire early this year and had to be completely rebuilt. The picture herewith shows part of the steel construction crew now erecting girders for the new mill. When finished the soy bean plant will be completely modern in all respects and will be of steel and concrete construction with steel bins for soya cake and sovbean oil meal.

The photograph also shows a section of Old Fort Mills million bushel bean storage which was undamaged by the fire and which will be renovated to receive the new crop beans. Not shown in the photograph is the ingredient warehouse and feed mixing plants which also escaped the flames and have been in full operation.

Many feeders are reporting excellent results in developing pullets by feeding mashes made from their own grains and Old Fort Chick Mix. If you want to have strong, healthy pullets grown at little cash outlay consult your nearest Old Fort dealer and learn how you too can FORT-I-FY your poultry profits with Old Fort Feeds.

May we also remind you that we have one of the most efficient pellet making machines in existence. Turkey feeders, poultry raisers, cattle and sheep feeders are enthusiastic about the results they are getting with Old Fort pellets because they are easy to feed, prevent waste and insure the eating of the complete ration.

Hog prices are going up and there appears to be every prospect that fall hogs will pay a profitable cash return to thoughtful feeders who have hogs they can finish for the fall market.

State experiment stations have found that 13 bushels of corn are required to grow 100 pounds of pork, and with corn worth 60 cents or more a bushel there is little possible profit in trying to produce pork on corn alone. By feeding Old Fort 40% Hog Mix you can save corn and produce 100 pounds of

pork with only five to six bushels of corn if you feed 35 pounds of Old Fort Hog Mix with the corn.

Don't overlook the opportunity to make more and better pork profits by this method of feeding. Phone or visit your nearest Old Fort dealer today. He will gladly furnish you with a supply of Old Fort Hog Mix and explain the Old Fort way to increased hog profit.

reason why congress should remain in active session. A bill for a system of compulsory military training and service has been presented

This bill presents a vital issue in debatable form. The issue is whether it is better for the United States to train an adequate, equitably chosen portion of its manpower in preparation for a possible emergency, or to wait until an emergency is at hand before preparing to meet

can neglect our defenses and live with a sense of insecurity and panic always just under the surface, watching the temper and fearing the reactions of the strong and aggressive, or we can tighten our belts, arm ourselves in full against possible conflict and live, not on sufferance and in fear but with the steady integrity of conscious strength. The first course is demoralizing and wretched; the second course alone is possible, and an essential link in the pursuit of that course is the obligatory training of an adequate, justly chosen portion of our manpower."

The bill provides for registration of male citizens and aliens between the ages of 18 and 85. with certain exceptions. Registrants would be divided into two categories—those between 21 and 45 liable for training and those between 18 and 21 and between 45 and 65 liable only for home defense. From the first group would be drawn by lot as many men as would be needed to man defense services, with a careful, selective process of exemption to assure a minimum of economic discuption.

It is a sweeping proposition, not a measure. In fact it embodies all the grim realily of adequate national defense which Ameri-cans prefer to keep concealed with big talk and small action. But if the people of this country honestly believe in doing what is necessary to make it as strong as it needs to be to discourage an aggressor there is no other answer

States is willing to do could be devised than to hold adequate debate on such a bill. Critics would have to come forth with objections and counter-proposals. Defenders of adequate defence would have to quit sending up trial balloons and furtively taking the public pulse. Opinion would be crystallized. Uncertainty would be stopped. Notice would be given to the world at large that one representative government had enough foresight and courage to face reality with its eyes open.

Elsewhere in the world there was always a residue of ideas surviving from previous regimes. The Faubourg St. Honore never fully accepted the French democracy; the Junker class in Germany never accepted the Germanic versions of the Eighteenth century credo, which found expression in the revolutions of 1848 and 1918, and, indeed, the whole German people never really underwent this experience of a society primarily based on regard for the political expressions of human rights. # Only One Standard Of Service Here . . .

While the price of a funeral varies with the grade of merchandise used, this organization has but one standard of service

Every family we serve is entitled to the use of our air conditioned funeral home and complete equipment. And even more important, we use the same painstaking care in professional work, regardless of the amount a family may spend

We have aided many families who could afford only a less expensive funeral to have a service that was satisfactors in every way
